Maximum capacity (kg)	80
Industry	Wood and furniture industry
Serial number	A6861
Function	Tilt
Gripping technique	Mechanical
Optional control	PSH
Noise Level (dB)	70

Work more efficient with a door gripper

With this door gripper, you can easily and effortlessly lift doors up to 80 kg. This mechanical door gripper clamps on the door stiles (long side of the door) and in this way grips the door securely. Once lifted off the ground, you can also tilt the door. Now it is possible to move the doors with precision and accuracy.

For the operator, this gripper removes the element of heavy lifting from the work, and the operator can work ergonomically. Doors can be awkward to lift on your own and usually require two people to lift. With this lifting solution, one person easily gets the job done on their own, which makes work more efficient. The gripper is especially useful in facilitating assembly work since it is very easy to maneuver.

Customized door gripper

We customize the lifting tool to your specific needs and the load you're lifting, ensuring it makes your work easier. We adjust maximum capacity, tilt, and how the tool grips the load based on how you want the lift to be performed. You can also lift door frames, panels, or other types of doors with a door lift. Read more about our other lifts for doors, panels, and door frames here.
