Efficient and ergonomic
material handling

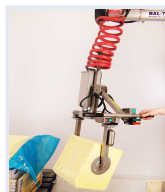

Item No.: 89-10202

Butter gripper 89-10202

Type of lifting object	Food
Weight (kg)	25
Maximum capacity (kg)	25
Industry	Food industry
Serial number	4899
Other characteristics	Stainless steel (SS)
Noise Level (dB)	67

The butter gripper is a customized lifting tool for the food industry, in particular for lifting blocks of butter that weigh up to 25 kg. The gripper is easy to use and moves the malleable butter effortlessly from pallet to conveyor belt without compromising the shape of the block.

The butter is protected by a plastic sheet that the user first opens up to access the butter. The spiked plateaus on the gripper press into the sides of the block, gripping on to it. The butter is then rotated manually (hands on the butter block) to remove the rest of the protective plastic sheet. It is then placed onto the conveyor belt.

The Butter Gripper is made for the handling of sensitive materials and meets the food industry's requirements for machinery, such as being made of stainless steel, having smooth contact surfaces and conforming to high hygienic standards.
