

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 89-10325

Contactor gripper 89-10325

Type of lifting object	Electronics
Weight (kg)	16.5
Maximum capacity (kg)	65
Serial number	4757
Gripping technique	Mechanical
Optional control	PSH

Contactor gripper 89-10325 – An ergonomic lifting tool

The contactor gripper is a specially designed tool for lifting electronically-controlled switches that weigh up to 65 kg. A contactor that would normally call for two people to lift, can now be handled by one.

The gripper is a small and relatively simple tool to use, but it has been carefully constructed to grip and hold on to a very slim area. In this instance, the contactors are picked up from a high conveyor belt and placed in boxes on the ground. Because of this difference in height, this gripper was designed with two control panels and handles – providing ergonomic support at all levels, adding flexibility to the work and making this gripper very user-friendly.

Lifts All used to lifting electronics and electronic accessories. [Contact Us](#) and we can customize a lifting solution to suit your needs and requirements!
