

LIFT WITH EASE

Efficient and ergonomic
material handling

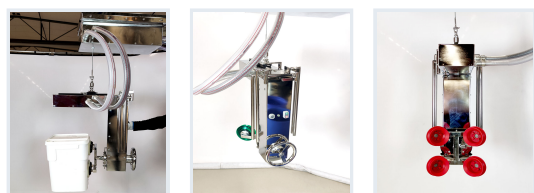

Item No.: 89-12007

Gripper for drums 89-12007

Type of lifting object	Medicines, Thin
Weight (kg)	69
Maximum capacity (kg)	55
Industry	Pharmaceutical industry
Serial number	A6543
Other characteristics	Stainless steel (SS)
Function	Manual rotation
Gripping technique	Vacuum
Optional control	PSH

This gripper for drums grips, lifts and tilts drums using pneumatic power. The gripper is specially designed for use in cleanrooms in the pharmaceutical industry.

We also make FlexiCranes that meets the requirements of a cleanroom environment, e.g., the stainless-steel FlexiCrane. There are four different applications for this gripper, making it a versatile lifting tool for several different types of drums, of different sizes and weights. Switching from one application to another is easy.

When in the air, the drum is weightless to the operator. In this position, the operator can now tilt the drum and pour out the contents. All the operator needs to do is press the 'release' button to unlock the drum, and then, turn the steering wheel in a controlled manner to empty the contents carefully. It is possible to tilt the drums both to the right and left with the steering wheel. You can now lift the drums from one place to another without injuring back, shoulders or neck.

Gripper for drums – specially adapted for cleanroom environments

Our tools for sensitive environments are specially designed to meet the requirements for use in the handling of pharmaceuticals and within the food and beverage industry.

We customize and design these lifting solutions in stainless steel so that they are safe for use in cleanroom environments. These tools are easy to clean, have no sharp edges, and no welds where dirt can accumulate. The vacuum cups are also made of FDA-approved materials for use in cleanrooms.
