Efficient and ergonomic
material handling

Article number: Grijphjul

Gripping Rolls

Weight (kg)	1, 1.6, 2.6, 5
Type of lifting object	sack
Gripping technique	Mechanical
Material wheels	Stainless steel, light alloy, Vulcanized natural rubber
Width (mm)	120, 50
Grip wheel diameter (mm)	65, 66
Height (mm)	65, 66
Configuration height (mm)	-33

Customized gripping rolls for different types of sacks

Our Mechanical Sack Gripper is designed to make handling sacks easy, safe and ergonomic. With interchangeable gripping rolls, the gripper can be adapted to different materials, environments and application needs - perfect for everything from industrial production to warehousing and food handling.

- **Vulcanized rubber - for jute bags and frequent lifting**

Vulcanized rubber rolls provide a soft but firm grip, especially suitable for jute bags or other textile materials. The durable construction is ideal for repetitive lifting.

- **Stainless steel - for sensitive and hygienic environments**

When high hygiene standards or easy cleaning are required—such as in the food or pharmaceutical industry—stainless steel rolls are the ideal choice. They tolerate frequent cleaning without degradation.

Wider rolls for fragile bags

For fragile or thin sacks/bags, wide gripping rolls can be used. The wider grip distributes the pressure over a larger surface area and reduces the risk of damaging the package when lifting.

Versions

	Article number	Weight (kg)	Type of lifting object	Gripping technique	Material wheels	Width (mm)	Grip wheel diameter (mm)	Height (mm)	Configuration height (mm)
