

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 89-12390

Lifting tool for electronic cabinets 89-12390

Type of lifting object	Electronics
Weight (kg)	148
Maximum capacity (kg)	50
Serial number	A7261
Optional control	PSH
Gripping technique	Vacuum
Noise Level (dB)	70

With a maximum capacity of 50 kilograms, this lifting tool for electronic cabinets offers an indispensable solution for companies that regularly handle heavy, metal cabinets. Its six suction cups ensure a firm grip on the sides of the cabinet, providing a secure lift. With a simple press of a button, even a 50-kilogram load becomes nearly weightless and easy to handle.

Tool for Moving Electronic Cabinets

The tool is easy to maneuver thanks to the Pro Speed-Handle control. This control unit gives the operator proportional control over the tool, providing full control as needed, to move the tool quickly or slowly just by regulating the pressure applied on the control buttons. The cabinet can then be maneuvered manually for precise positioning into the desired place.

One of the advantages of this tool is that it can also lift cabinets of different weights, as long as the cabinets have the same dimensions. This means that only one lifting tool is needed to lift many different cabinets - saving time and resources while increasing workflow efficiency.

Lifts All has manufactured many different lifting aids for electronics. You can find some examples [here](#). One of our most common tasks is to customize lifting tools for different loads. [Contact Us](#) - we would be happy to work with you to evaluate how you can streamline production, while creating a more comfortable working environment with the help of a lifting solution.
