Efficient and ergonomic
material handling

Item No.: 89-12353

Gripper for plastic boxes 89-12353

Type of lifting object	Box
Weight (kg)	11
Maximum capacity (kg)	25
Serial number	A7188
Optional control	PSH
Gripping technique	Mechanical

Lifts All's lifting tool for plastic boxes is designed to lift boxes or containers easily and efficiently. It provides an improved workflow and reduces the risk of work injuries, especially in industries like food production.

The lifting tool is equipped with rubberized gripping arms, ensuring a stable and secure lift every time. The arms grip from the inside of the plastic boxes, meaning they can be loaded and unloaded closely together on pallets without the heels getting in the way. With the help of the lifting tool, the boxes are loaded weightlessly from, for example, a pallet to a conveyor, or vice versa.

Ergonomically extended handle

With the ergonomically extended handle, the operator can easily load without having to bend the back in uncomfortable positions. This promotes a healthy work environment and allows reaching the top layer of containers during high stacking. By avoiding uncomfortable body positions, the risk of strain injuries is reduced, prioritizing the well-being of the operator.

Mechanical lifting tool

Our lifting tool for plastic boxes is powered by a pneumatic cylinder and functions as a mechanical lifting tool. By using a gripping function instead of suction cups based on vacuum pressure, it can effectively handle uneven, irregular, or non-sealed surfaces. This makes it the ideal choice when traditional vacuum lifting tools are not suitable.

Customized lifting tools for all boxes

[Contact Us](#) today to customize your lifting tool and optimize the handling of plastic crates or other loads. We offer customized lifting solutions that meet your specific needs and improve your working environment. For increased efficiency and safety in your particular business.
