Type of lifting object	Box
Weight (kg)	12.5
Maximum capacity (kg)	50
Serial number	A7092
Gripping technique	Combi
Optional control	PSH
Noise Level (dB)	75

Lifts All's Combi-Gripper for Boxes is equipped with both vacuum suction cups and a hook. Using the vacuum cups, boxes and other more compact flat objects can be lifted easily, while the hook enables buckets and containers to be carried about effortlessly. The combi-gripper is a versatile lifting tool that helps operators in several lifting momentums in, for example, a packing process. By using a combi-gripper, you save on both resources and space, as you only need one lifting tool to lift several objects.

Ergonomic combi-gripper

The Combi-Gripper for Boxes is an ergonomically beneficial lifting tool. Besides relieving the operator from the weight of the load, it is also designed to be comfortable to use. The handle can be lengthened to suit the operator's height and to reach the intended objects. Rubber handles ensure a steady and secure grip, and because of the way it has been designed, you always work comfortably with your elbows close to you.

Learning how to control the lifting tool is easy and its movement is smooth. Turn the switch to decide on using the hook or the vacuum suction cups. The round, red and green buttons are for gripping and releasing, and the red and green levers are for lifting or lowering. With ease, you can place the load wherever you want, without strenuous manual lifting.
