Sack and carton combi-gripper 3675

Type of lifting object	Cardboard sack
Weight (kg)	11
Maximum capacity (kg)	25
Serial number	3675
Gripping technique	Combi
Optional control	PSH

Combi-gripper for sacks and cartons

A lifting tool that can lift both sacks and boxes up to 25 kg. To lift sacks, use the vacuum-sack application. When it's time to lift boxes, just change to the H-frame vacuum application. Changing applications only takes a few seconds. It's fast, easy and the operator can get right back to work.

Investing in a combination gripper (known as a combi-gripper) optimizes the user's area of application. Instead of using two separate grippers, which can be both costly and space-consuming, the operator can use the same gripper for several different products or materials.
