Item No.: 2149

Gripper for gas cylinders 2149

Gripping technique	Vacuum
Maximum capacity (kg)	13
Optional control	Balancing
Type of lifting object	Gas cylinder

Vacuum gripper gas cylinders – safe and ergonomic handling

This Vacuum Gripper is custom designed for safe and efficient handling of gas cylinders. The tool grips the gas cylinder by the top using vacuum technology, providing a stable and reliable lift without affecting the sides of the cylinder, making it easy to pack the cylinders tightly.

The gripper is equipped with a balancing control unit that makes the load feel weightless. This gives the operator full control and minimizes physical strain during lifting, lowering, and positioning. The result is an ergonomic working environment with increased precision and reduced risk of strain injuries.

The vacuum gripper is designed for gas cylinders weighing up to 13 kg and is ideal for environments where safety, efficiency, and user-friendliness are crucial.
