Industry	Distribution centers and warehouses
Noise Level (dB)	60

Manhattan box gripper- Lifting tool for boxes

The box gripper is one of our more popular lifting tools and a handy tool for lifting all sorts of plastic boxes and placing them high up on shelves that are otherwise hard to reach.

The lifting tool has a clamping mechanism that grips the boxes securely and will not let go until the operator presses the "release" button. The operator can grip a box with precision, quickly hoist it up to desired height, and place it securely without any risk of the box falling over or spilling its contents.
