

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 89-12052

Manhattan Mini 89-12052

Type of lifting object	Box
Weight (kg)	45
Maximum capacity (kg)	30
Serial number	A6605
Gripping technique	Manhattan - Lift high, Vacuum
Optional control	PSH
Noise Level (dB)	65

The Manhattan Mini is a Vacuum gripper uses vacuum cups to grasp and lift cartons to a lifting height of 170 cm. The cups create a vacuum that provides a stable and secure grip the load without leaving marks. The lift is easy to learn. With just a few button presses, the load is gripped, lifted, and placed in the right spot. The operator never has to bend down, maintaining a comfortable working position throughout the entire lift. This contributes to a more ergonomic work environment with fewer work-related injuries.

Manhattan Mini – Lifting tool for confined spaces

Manhattan is a series of lifting tools created especially for those who need to lift objects up high or down low. You can for example use it to lift carton boxes up on a shelf or into a stand. That is why it often can replace a forklift truck. The Manhattan Mini model is adapted for lifting up to 170 cm even in small spaces, e.g. rooms with normal ceiling height.

Lifts All has great experience in adapting lifting systems to small spaces. With the right circumstances we can install the lifting tool in a ceiling mounted traverse system almost smooth against the ceiling. The system is held up by pillars, that stands tightly against the room's four corners, which optimizes the space for operator to work in. Hence, he or she can utilize the whole area to load and unload packages.
