

LIFT WITH EASE

Efficient and ergonomic
material handling

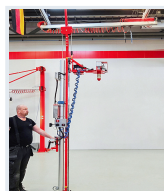

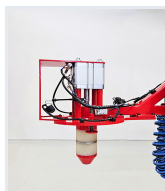

Item No.: 89-12535

Manhattan roll gripper with camera 89-12535

Type of lifting object	Roll
Weight (kg)	80
Maximum capacity (kg)	150
Serial number	B55318
Optional control	PSH
Gripping technique	Manhattan - Lift High, Mechanical

Efficient lifting of heavy rolls

The Manhattan Roll Gripper is an efficient and ergonomic solution for workplaces that regularly handle rolls of materials such as steel strapping, paper, wire, or plastic, weighing up to 150 kg. The roll is gripped directly at its core using an expander, providing a stable and secure lift even with heavier loads.

Optimal for working at heights

With a lifting height of 1.95 meters (6'4"), the tool is especially ideal for workplaces where rolls need to be lifted and placed on high shelves.

Focus on ergonomics and control

To simplify operation, the roll gripper is equipped with an adjustable handle that makes maneuvering smooth and ergonomic. An integrated camera with a display also gives the operator full control and visibility of the load – even when it is lifted to a high position.
