Type of lifting object	Stone
Weight (kg)	70
Serial number	4743
Maximum capacity (kg)	50
Function	Rotation
Gripping technique	Manhattan - Lift High, Mechanical
Optional control	PSH

Lifting tools for stone blocks

This gripper is custom-made to lift stone blocks up to 50 kg. The lifting tool is an efficient and flexible tool that can be used by any operator, regardless of physic or previous experience. For ergonomic support, the control handle can easily be adjusted to the operator's height. The operator grips the stone blocks on the short end and can then easily move it up and down with the two Pro Speed-Handle levers. With a flip of a switch, the stone block can also be rotated 90° or 180°.

This lifting tool is used for lifting stone blocks from a pallet on to an inspection bench, where its ability to rotate the load comes in very handy. The rotation function also allows the block to be placed down in a more efficient way, i.e. ready for use.
