

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 2813

Pallet gripper 89-12178

Type of lifting object	Pallet
Weight (kg)	8
Maximum capacity (kg)	30
Serial number	2813
Function	Rotation
Gripping technique	Mechanical
Optional control	PSH
Industry	Distribution centers and warehouses

The pallet gripper is a very useful lifting aid that lifts pallets to 30 kg by gripping the center of the pallet with claws. With this lifting tool, the user can easily stack or move pallets another part of the workplace. Handling is faster than with a conventional pallet gripper forklift truck, as the lift grips the pallet in just a few seconds and can rotate the load indefinitely in a small space. It is also small and maneuverable and does not take up as much space in the workplace as a forklift truck. Its maneuverable design also means that it can be used to lift high in low-built environments.
