

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 92-10060-Mk2

Roll gripper [120]kg - Tilt (90 degrees)

Weight (kg)	28
Maximum capacity (kg)	120
Type of lifting object	Roll
Function	Tilt
Height (mm)	1350, 740
Configuration height (mm)	-1077
Noise Level (dB)	60

With Lift's All- Roll gripper , lifting rolls is easy. The roll lifter uses a piston to grip the roll by its core without damaging the outside. The roll can then be angled horizontally or vertically, depending on how you want to position it. The lift is height-adjustable, making it easy to place the roll on shelves or into machines. The operator can perform their entire job without having to do strenuous manual lifting. The roll becomes completely weightless on the roll lift.

Adaptable for different rolls

The lifter can lift most rolls or spools with a hollow center. For example, it can lift paper rolls, foil rolls, aluminum rolls, or plastic rolls. The lifter is equipped with a matching expander to ensure an optimal fit for the roll. Selection of [expanders](#) can be found here, but we also manufacture custom expanders.

The lift is easy to operate and gently lowers the roll using the smooth PSH control. It also doesn't take up unnecessary space and is energy-efficient. This particular model, the Roll gripper , can lift very heavy rolls, up to 120 kilograms. The lift's capacity is fully customizable; if you need to lift heavier or lighter rolls, we'll tailor it to your needs.

Roll gripper for different industries

Within Lifts All's range of roll grippers, there are grippers that can lift, rotate, tilt, mount and move rolls. This makes the roll gripper a popular choice for manufacturing industries where heavy manual lifting is being phased out. Such as, in the paper industry, timber companies and the beverage industry. With

our flexible lifting tools operators can work more ergonomically and be freed from the unsustainability of manual lifting.

Further information

Expanders

The expander applications fit different rolls depending on the size of the core. The piston grips the core of the roll and expands, making it possible to lift rolls up to 120 kilos. Expander 92-10061 is 76mm wide and expander 92-10062 is 152mm wide.
