

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 89-12039

Tire gripper 89-12039

Type of lifting object	Car component
Weight (kg)	21.7
Maximum capacity (kg)	40
Industry	Automotive industry
Serial number	A6581
Function	Manual rotation
Gripping technique	Mechanical
Optional control	PSH
Noise Level (dB)	66

Tire lift that simplifies the handling of heavy tires

A specially designed tire lifter from Lifts All handling tires easier and more ergonomic. Our tire lifters feature grip can be easily adjusted without tools to accommodate tires of various sizes. With this particular tire lifter, you can handle tires with a maximum weight of up to 40 kg and diameters between 600-800 mm, covering a wide range of the most common tire sizes on the market.

Smart tire lift for more efficient work

Our tire lift is designed to make heavy lifting safer, more efficient and easier. The mechanical lift uses smart technology to fix the tires, while the pneumatic cylinder allows you to lift and maneuver the load effortlessly. With our Wheel Gripper, you can easily change the position of the tire by 90° by adjusting it with your hands to the desired position.

An ergonomic tire lift protects your health

Today, tire handling is often done manually, which means a lot of heavy and one-sided lifting that can lead to repetitive strain injuries. With our specially developed tire gripper, you can easily lift and move heavy tires without strain on your shoulders, arms or back. Our tire gripper allows you to work with tires weightlessly and ergonomically, without risking injury.

Wheel Gripper a Better Work Environment

An investment in a Wheel Gripper from Lifts All often pays off quickly through reduced sick leave and more efficient work processes. When employees avoid harmful and heavy lifting of tires, the risk of occupational injuries is significantly reduced. You get an improvement in both productivity and personal health thanks to the ergonomic design of the tire lift.

Custom-made tire lifts tailored to your needs

With us, you can get a tire lift that is tailored to your business and the tires you handle. We have experience of manufacturing thousands of customized lifting tools and can help you find the optimal solution for tire handling in your business.
