

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 89-12579

Lifting tool for toilets 89-12579

Gripping technique	Mechanical
Function	Manual rotation
Type of lifting object	Toilet
Maximum capacity (kg)	55
Optional control	PSH

Area of application

This lifting tool for toilets is used in production environments to stack and pack toilet bowls for transport. Thanks to its ergonomic design, which removes the weight from the user, handling becomes both safer and more efficient. The operator uses the tool in repetitive work tasks, which creates a smooth, ergonomic, and safe production flow.

Design and function

The lifting tool is a mechanical gripper that lifts toilets with a maximum clamping grip of 80 mm. The free-rotating grip rollers allow the operator to rotate the seat manually in order to position it precisely for stacking and packaging. If necessary, the friction brake locks the rotation and provides full control during handling.

The tool can lift up to 55 kg and is designed for continuous use in demanding industrial environments.
